EDUCATION

Master of Science in Software Engineering Systems

Northeastern University

Relevant Courses: OOP, iOS Development, Algorithms, Adv Big Data, Design Patterns, UI/UX

Sep. 2023 – August 2025

Boston, MA

GPA: 3.8/4

Bachelor of Engineering in Computer Engineering with Distinction

University of Mumbai

Relevant Courses: Operating Systems, Distributed Computing, Cloud Computing

Aug. 2019 – May 2023

Mumbai, India

CGPA: 8.81/10

EXPERIENCE

Software Engineering Co-Op

National Internet Observatory, Network Science Institute, Northeastern University

July 2024 – Feb 2025

Boston, MA

- Designed, built, and maintained production-grade **iOS features in Swift/SwiftUI** for a custom NSF-funded app with integrated VPN, enabling secure, real-time packet-level and flow-level data collection for large-scale internet traffic analysis.
- Improved startup performance and battery efficiency by 40%** through custom caching strategies, optimized background task scheduling, and concurrency tuning, ensuring a responsive and reliable mobile experience.
- Enhanced data richness by 75% by integrating **SensorKit** with fault-tolerant, scalable processing pipelines, and collaborated cross-functionally to refine UX flows while balancing craft, speed, and scalability.

Software Developer Intern

Nakshatra Eye care

March 2021 – Feb. 2022

Mumbai, India

- Led the design and development of a distributed management system, reducing clerical errors by 93% through scalable record-keeping and intuitive UI design that streamlined daily operations.
- Partnered with doctors to translate requirements into clean, maintainable solutions, increasing patient throughput by 78% via automated workflows and optimized data handling.

Software Engineer Intern

SAKEC Marathon

Feb. 2021 – April 2021

Mumbai, India

- Delivered an Android app with **sensor-based algorithms** (accelerometer, gyroscope) to track marathon performance for over 1,000 active users with reliable real-time data collection.
- Implemented real-time offense tracking using a speedometer, step counter, and distance tracker to ensure fairness, accuracy, and integrity of competition results.

PROJECTS AND PUBLICATIONS

StreakSync | Swift, SwiftUI, iOS 26, Share Extension, App Groups, UserDefaults, Instruments

June 2025 – Present

- Designed and implemented a modular SwiftUI architecture using **@Observable** state management, **NavigationCoordinator**, and AppContainer-based dependency injection, enabling scalable development and clean navigation across multiple tabs.
- Built a **Share Extension** for parsing puzzle game results (Wordle, Quordle, Nerdle, Heardle) with App Group syncing, and applied **iOS 26 APIs**—material backgrounds, scroll transitions, numeric text animations—to deliver a polished UI.

Performance-Based Gamified Learning | Flutter, Flask, MongoDB, PostgreSQL, Docker

June 2022 – April 2023

- Created an AWS-hosted REST API with a personalized mock test engine, achieving 94% accuracy in recommendations and supporting over 2,000 students through dynamic SWOT analysis and adaptive question generation.
- Integrated multiple frameworks and services to deliver **fast, intuitive mobile experiences** across iOS and Android.

Random Forest Sampling for Crop Recommendation | Python, Flutter, AWS

June 2021 – April 2022

- Built a farmer-centric mobile app analyzing 676K+ location samples and 2,200 soil samples to provide personalized crop recommendations, improving yield efficiency.
- Published in IEEE Journal at the 2023 International Conference on Advanced Computing Technologies and Applications (ICACTA), **winning Best Paper** among 300 presentations. [DOI Link](#).

SKILLS

Languages: Swift, Objective-C, Dart, Kotlin, Python, Java, JavaScript, TypeScript, C/C++, SQL, .NET, Golang

Frameworks: SwiftUI, UIKit, AppKit, Combine, CoreData, XCTest, Concurrency (MVC, MVVM), Flutter, React.js/Native, GraphQL, Apollo, Tailwind, TensorFlow, Vue, Express, Angular, Flask, Django, Spring Boot

Tools: Xcode, Instruments, Android Studio, AWS, GCP, Git, Docker, Kubernetes, CI/CD, REST API, Microservices, Agile, Unit Testing, Atlassian Suite (JIRA, Confluence, Bitbucket), OOP, SOLID, SDLC

Databases/Networking: MongoDB, DynamoDB, Firebase, PostgreSQL, MySQL, Oracle, WebSockets, gRPC, UserDefaults

Interpersonal: Collaborative team player, empathetic communicator, adaptable, results-oriented, user-focused

EXTRACURRICULAR

- Led the winning Smart India Hackathon team; owned structure and UI/UX of an online education app (2022).
